In Lies We Trust: The CIA, Hollywood & Bioterrorism

a documentary by

Dr. Leonard George Horowitz

If this life-saving documentary doesn't shake your confidence and awaken your intelligence about medical madness cloaked in bioterrorism preparedness, then you are definitely brain dead.

Government health officials, directed by the Central Intelligence Agency (CIA), are promoting your preparedness for emergencies including deadly outbreaks and bioterrorist attacks. Behind this propaganda lies genocide, according to evidence compiled and presented in this riveting film by Dr. Leonard G. Horowitz, a world-renowned authority in public health education, covert intelligence agency operations, and emerging diseases investigations.

This film exposes the agents and agencies behind:

- Hollywood films and the media creating a culture of profitable bioterror.
- The global population controllers' "War on Terrorism."
- The most lucrative war in history—the "War on Cancer."
- The onslaught of dozens of new immunological diseases and medically mysterious flus.
- The "War on AIDS" triggered by contaminated vaccines
- The world's deadliest anthrax mailed to restrict freedoms, sell toxic drugs, deadly vaccines, and more.
